Project and Construction Management CIVE 4400/BUSI 4308
Fall 2012

Assignment No.1

Objective:

The objective of this assignment is to get familiarized with the bidding procedure of construction projects.

Requirements:

- Each group is to choose a construction project of their choice (Hint: there's a lot of construction going on on-campus)
- Describe construction project, nature, location, the need for the project, and the scope of work, etc.
- Describe construction methods on site
- Describe the type of contract (e.g. design, bid, build)
- When did the project start, and when is it expected to finish
- Describe the bidding procedure and contract award. This includes:
 - Was there a prequalification process?
 - Notice to bidders? When? How?

Expectations:

- You are expected to submit a report authorized by all students in your group. This is not a short answer assignment. The work effort of each student should be clear.
- You may depend on published materials (report, websites), personal contacts or any other source you might find. In any case, reference all information in the report.

Due Date: Friday, September 28, 2012
