Question 1 (30 marks)

A 2.4-m boom is held by a ball-and-socket joint at C and by two cables AD and AE . For the loading shown, determine:

- (a) The tension in each cable;
- (b) The reaction at C .

Question 2 (25 Marks)

Knowing that the tension in wire BD is 1300 N , determine the reaction at the fixed support C of the frame shown.

Question 3 (25 Marks)

A beam supports loads as shown where $M = 24 \text{ kN.m}$. Determine the reactions at the supports A and B.

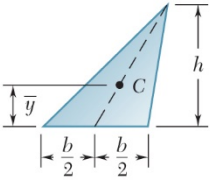

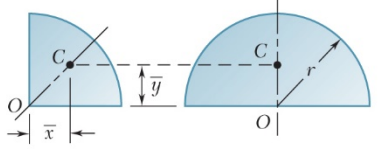

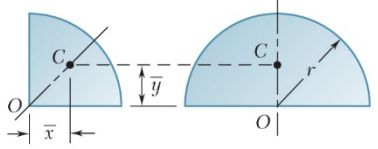

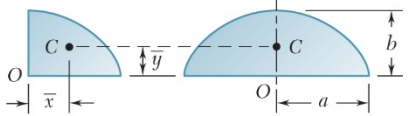

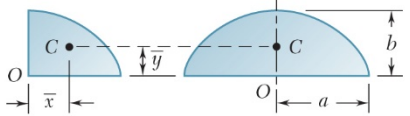

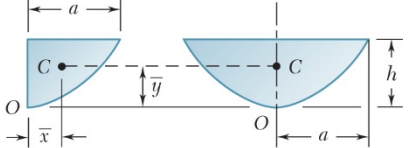

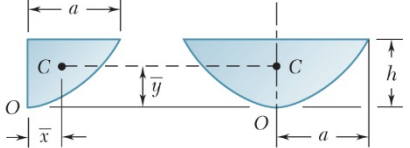

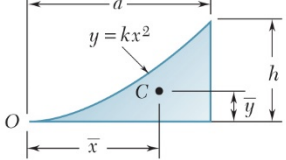

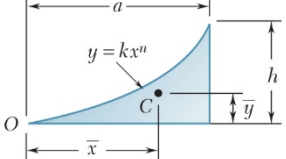

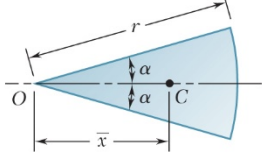

Question 4 (20 Marks)

Determine the centroid of the plane area shown in the figure. The equation of the parabola is $y = kx^2$.
