Chapter 7 review

IF statement in Excel (not VBA)

IF (condition) test value, [value if true], [value if false]

Can be nested

True & false values can be VBA

String

number

expression

calculation

function

or another IF

if Sales > test value then

else

end if

Case statement has value IS for expressions

~~select case~~

With Range("A1")

For r=1 to 500

offset(r,0) = r*3

Next

End with

You can set the status bar

Application.StatusBar = "string"

To return it to default use null string

Application.StatusBar = ""

.setSourceData Source := Range("A1:E5")

→ For a chart
