

Socio spatial dialectic

Lefebvres conceptual triad→ spatial practices: lived material world, experience/representation of space: official legalistic enforcement of boundaries, zoning, political maps. official desc of how spaces can be used/ representational spaces : depiction of spatial practices...how people use the space...

Dialectic urbanism

Five approaches to studying the city

The public sphere civil society and urban governance

The industrial city the fordist suburbs housing segregation

Neighborhood movements, citizen participation, urban renewal

Post industrialism

5 approaches of urban geography

Ecological

postivist/scientific

Behavioral

Structural: class, norm diff structure and economy diff structure

Post-struc: structure of racial gender and demography is closely tied to and related econmic structure..multiple things coming together to produce urbanization

II

Cities and capital: global cities, deindustrialization, gentrification

Urban sustainability fix/environmental racism/justice

Housing: use/exchange value, crises, Vancouver, race

Urban informality, postcolonial urban theory, urbs nulliys; Global South/North Binary

Power, participation, and difference - detroit and vancouver

The urban imaginary- used to navigate (Kevin Lynch) and judge (appraisive mental maps and dominant media narratives...but also... to imagine different futures (Le Guin)

Righ to the city: possibilities and critiques

Lee reading: in a racilaized neighborhoodcumminty went past the ladder to reach meaningful changes
